

The Hooligans CSE 370

1. As a team, research and discuss 3 ways that you can help set expectations
 - a. We will set and define clear checkpoints for the projects.
 - b. We will solve any confusions each member would have about the documentation of the project during the group discussion.
 - c. Help each other out in terms of confusion or unexpected troubles come out and properly communicate

2. As a team, find one thing about each team member that is unique (skill, experience, goal)

Daniel: able to have an open mind when working with others on a project

Eric: I'm a decently creative thinker and I also consider myself to be a strong listener

Shad: Have software development and management skills from internships and personal projects which can be used to successfully deliver the expectation for the team project

Dheeraj: Has both mobile and web development experience and is design enthusiast which can help in the development cycle of the projects.

Ze: Have some backend experience that deals with the databases and information transformation between clients to the server.

3. As a team, how will you communicate? In person? Via e-mail? Piazza? Slack? Decide on at least 2 channels of communication. (Your PM may require an additional channel).
 - a. We will communicate both in person and also via Discord.

4. How will you resolve conflict? Decide on a method to resolve disagreements. Funny is best.
 - a. To resolve a conflict, we will approach the conflict in an appropriate manner on how to solve the conflict as a team.
 - b. We will be very communicative with each other when a member is struggling on a task on the assignment.
 - c. Will try to handle the situation amongst ourselves as best as we can first, but if we can't get to a proper solution we will ask the instructor for help mediating it.
